#### **KIDS ASK LOTS OF QUESTIONS- NEMOURS HAS THE ANSWERS**

"Why does my nose run? What are taste buds? Where do tears come from?" Parents know that kids have many questions about their bodies. To help kids — and parents — uncover the mysteries of the human body, Nemours has launched a new feature for kids, "How the Body Works." Using kid-friendly language, animations, and activities, "How the Body Works" is a great resource for homework help and an entertaining way for kids to get answers to their questions.

*Dr. Lloyd Werk*

The interactive online center includes more than 100 articles, quizzes, word searches, activities, and movies, and covers 19 body parts. Dr. Lloyd Werk, co-director of Nemours Healthy Choices Clinic, says, "This new KidsHealth.org web site is a really fun way for children to learn about their body and is a great resource for school work. It may spark the imagination of a future doctor, nurse or other health care professional in the house."
